

## MOOVINV LAUNCH NEW WEBSITE, PROVIDING AN INNOVATIVE SOLUTION FOR BUYERS AND SELLERS OF RAW MATERIAL

**T**he impact of the Coronavirus Pandemic has left various industries experiencing unforeseen difficulties. One significant challenge both small and large manufacturers are currently facing is surplus inventories. With surplus inventories comes a cost.

Meanwhile, other organisations are experiencing difficulties with their supply chain, due to some raw material shortages.

To provide a solution to both difficulties, **MoovinV** are proud to announce the launch of their new website. The newly designed site - [www.moovinv.com](http://www.moovinv.com) - matches buyers to sellers of surplus

inventory, through an innovative web portal. Its overall mission is to resolve both continuous and current supply chain challenges within numerous sectors, such as Aerospace, Defence, Oil & Gas and the Medical industry.

The MoovinV site aims to give sellers the economical solution they currently need to liquidate excess inventory. Through an easily accessible online platform, organisations are able to list their surplus inventories for international exposure, free of charge.

The new web portal also addresses the unprecedented challenges buyers face with cost and availability. In the form of an

online one-site shop, buyers are able to quickly find surplus material from across the globe, using an advanced website search engine.

Buyers can request quotes simultaneously and purchase listed raw materials at less than market value cost. The site currently hosts over a billion US\$ of surplus metal inventories, and the listings are constantly growing!

Alongside this, MoovinV offer support on sourcing raw materials that are not listed on the site.

MoovinV was founded by Aerospace Executives, who had first-hand experience with challenges such as line stoppage

and acquiring raw materials quickly.

In discussion of the new site, **Jacques Ouellet** (CEO & Founder) said "We are incredibly excited to announce the launch of our new website, following months of commitment and hard work. After the impact of COVID-19, we hope the site can help a variety of industries with both their buying and selling process."

The surplus featured on the new site includes a multitude of alloys, in a variety of shapes and dimensions, on a global scale.
